Crassulaceae

Echeveria lilacina

In botany, succulent plants, also known as **succulents** or sometimes **fat plants**. The word *succulent* comes from the Latin word SUCUS, meaning juice, or sap.¹ Succulent plants may store water in various structures, such as leaves and stems.

Echeveria lilacina, common name **Ghost Echeveria** or **Mexican Hens and Chicks**, is a species of succulents in the genus ECHEVERIA belonging to the family CRASSULACEAE. The genus name ECHEVERIA was given in honor of the 18th century Mexican botanist and painter Atanasio ECHEVERRÍA y Godoy, famous for his paintings of plants.

As plantas suculentas são aquelas nas quais a *raiz*, o *talo* ou as *folhas* foram engrossados para permitir o armazenamento de água em quantidades muito maiores que nas plantas normais. Esta adaptação lhes permite manter reservas do líquido durante períodos prolongados, e sobreviver em ambientes áridos e secos que para as outras plantas seriam inabitáveis.

O exemplo mais típico de suculência é a dos *cactos*, cujos talos apresentam uma grossa capa de TECIDO PARENQUIMATOSO. Além dos cactos outras diversas famílias vegetais apresentam o mesmo fenômeno.

Sukulenty, rośliny gruboszowate (łac. *succulentus* – soczysty) – grupa kserofitów, czyli roślin, które przystosowały się do życia w warunkach ograniczonej dostępności wody wykształcając tkankę wodną służącą do jej gromadzenia oraz szereg dalszych adaptacji w budowie i fizjologii.

Do roślin gruboszowatych, zaliczane bywają też rośliny różnych siedlisk, jak np. gatunek *Crassula helmsii*² będący rośliną wodną.

Some definitions also include roots, so that geophytes that survive unfavorable periods by dying back to underground storage organs may be regarded as succulents.

Crassula helmsii
(aquatic plant, succulent)

Artigo

Artigo started out as a typeface intended for use in magazines, thinking of the variety of the editorial market but it is flexible in its use due to its personality and usability. It was inspired by the handwriting aspect of the first roman types and it intends to be a contemporary interpretation. Its abilities are in small text with personality. This project started at the University of Reading while attending the MA Typeface Design in 2011. It is currently being developed into a workhorse old style typeface. The greek won the second prize of the Granshan Awards in 2011.

About Nova Type Foundry:

Nova Type Foundry is an independent type foundry based in Porto, Portugal. We aim to bring to life new and original designs by fresh and upcoming type designers. Nova Type is an independent type foundry founded by Joana Correia in 2018, based in Porto, Portugal.

We sell our retail typefaces directly on our website. Besides creating careful retail typefaces Nova Type also provides custom typeface design services.

Collaboration is the main core value as a foundry. Nova Type aims to bring to life new and original designs by fresh and upcoming type designers. All our fonts are created with a lot of care and attention to detail.
